

# TECHNICAL SEMINAR ON RADIANT COOLING SYSTEM

**Date: 6 November 2024**

**Time: 19:00 - 20:00**

**Venue: Online via Zoom**

## **Programme Highlights:**

Energy saving and green buildings is one of the major decarbonisation strategies in Hong Kong's Climate Action Plan 2050. The concept of radiant cooling systems has been utilized in Europe for more than three decades. The principle involves circulating a chilled fluid through pipework in radiant panels to absorb thermal energy and lower room temperature.

M Concept Studio Ltd. is a green tech startup company, specializing in green indoor environmental control system for buildings. One of their expertise is radiant cooling system design which was showcased in COP28 World Climate Summit.

This webinar will cover the principles of radiant cooling systems, a comparison with conventional air-conditioning systems and case studies for successful projects.

## **Speaker:**

Mr. John Wong, Project Manager of M Concept Studio Ltd.

## **Language:**

Cantonese with English Terminology

## **Registration & Enquiry:**

The seminar is free of charge and prior registration is required. For prior registration, please register at the enrolment website: <https://forms.gle/kHakqUWNSleMhkJM6>
